## Press Release

### Fun Fly Bay Goblin Kit Module from Old School Model Works

Add this optional accessory kit to your Old School Model Works GHOST to open up your Fun Fly Bay to Goblin drop ship capabilities, with the GHOST being the mother-ship. Once assembled, this module bolts into the fuselage and gives you the ability to RESPONSIBLY drop the included Goblin glider from the GHOST at altitude.

This is a quick kit to assemble, all laser-cut from lite-ply, and be assembled in about an hour using C/A glue. All hardware is included for the latch mechanism: pushrod, clevis, etc. Simply use your own standard sized servo (or smaller), and servo mounting hardware - as a wide variety of servo sizes can be used.

Once assembled, the Base Unit bolts into the fuselage of our GHOST with two bolts. Then simply plug your servo into a spare channel, adjust the throw and you're ready to go.

The Base Unit also incorporates a manual override on the latch mechanism - this allows you to attach/remove the Goblin from the GHOST without needing to power up your radio.

Included are TWO ready-to-assemble Goblin gliders. The fuselage is sturdy basswood and the flying surfaces are balsa. Laser cut and etched, this kit is a snap to assemble because of the included jigs. Once assembled the Goblin includes a top hook that quickly secures inside the Goblin Base Unit.

The Goblin Glider is also a lot of fun to hand-launch when you can get out and fly your Goblin!

#### Features/Specifications:

- Ready to assemble kit
- Self contained unit that bolts into the GHOST with two bolts
- Includes installation and latch hardware
- Also includes 2 ready-to-assemble Goblin Gliders
- Plug your servo into a spare channel and it's ready to go
- Requires: a servo and servo mounting hardware. (not included)

**Retail Price:** \$28.95
