RADIO CONTROL KITS \* WOOD KITS \* DECOR \* LASER CUTTING SERVICES

3/2023

## Press Release

### Minuette from Old School Model Works

We're introducing the latest in our line of kits that you can not only build and fly successfully, but personalize them to your own taste. We're continuing to bring back great designs from the past and rework them to incorporate modern, laser-cut techniques to make kit building better than ever. All of our kits are made right here in the USA.

The Minuette is designed to mimic the look and feel of those wonderful Edwardian flying machines that were flown by those magnificent men. Beautiful, isn't she? And like all great ladies, her graceful ways are evident the moment she takes to the skies.

Building the wing is a snap as all of the ribs are laser-cut as part of our WEB-LOCK construction for proper alignment with minimum fuss.

If you want to go truly "old school", it can be built for simple 3-channel control (rudder, elevator and throttle). For even more control, the included ailerons can be made fully functional (4 channel control).

Although power can come from glow or electric powerplants, a simple 3s electric setup is really what the Minuette is designed around. We've created the fuselage with a huge top hatch so you have quick access batteries, radio, and it also hides the wing-bolts.

In the air, the Minuette is a simple, easy-to-fly cruising aircraft. Takeoffs are in just a few feet, even from grass runways. Once airborne, relax and gently glide her through the air through a series of low-passes, gentle turns, and even horizontal figure eights. With a 3200mAh battery, you can easily achieve 10+ minute flights with plenty of battery left for some touch-and-go's before landing.

The Minuette can even handle a bit of light wind without too much problem, and she is at her best taking off and landing into those gentle winds, if possible.

Completed Minuette shown with optional Minuette Accessory kit - sold separately.

#### **Specifications:**

Wingspan: 67.5 inches  
Wing Area: 630 sq. inches  
Length (airframe only): 38 inches  
Weight: 3.5-4 pounds RTF  
Radio: 3 or 4 channel

#### **Power:**

- Glow: (.15-.25 glow)
- Electric: (250+ watt, 40+ amp ESC, 3S LiPo)

**Retail Price:** \$179.95
