RADIO CONTROL KITS \* WOOD KITS \* DECOR \* LASER CUTTING SERVICES

04/2018

## Press Release

### Robinhood 25 from Old School Model Works

We're introducing the latest in our line of kits that you can not only build and fly successfully, but personalize them to your own taste. We're continuing to bring back great designs from the past and rework them to incorporate modern, laser-cut techniques to make kit building better than ever. All of our kits are made right here in the USA.

Our Robinhood 25 is a fun-scale version of the Curtiss Robin built back in the 1920's. This model retains all the good, clean looks of the original marketed by World Engines in the 1980's and retains all the great flying characteristics that make a good sport airplane.

In the air, the Robinhood 25 is a true barnstormer and is at its best when cruising on a lazy afternoon or performing some gentle aerobatics. Also, there's no problems with mown-grass runway takeoffs and landings.

Power can be from either electric or glow. We've designed the fuselage with a built-in hatch so you have quick access to either your batteries or fuel tank.

Utilizing our unique WEB-LOCK construction, you can build our wings, straight and true - with a minimum amount of fuss. And, staying true to the original Robinhood 25, we have replicated the original bolt-on system for the wing.

If you want to go truly "old school", this kit can be built for simple 3-channel control (rudder, elevator and throttle). For even more control, the included ailerons can be made fully functional (4 channel control).

Included in each Old School Model Works kit are full-sized rolled plans, a printed construction manual, pre-bent main gear, hand-selected balsa and ply woods, and a premium hardware package from brand-name, USA manufacturers (DuBro, Sonic-Tronics, and others) to guarantee the best quality.

What's more is you can cover and finish your Robinhood 25 like you want, rather than being stuck with a "me-too" offering that look exactly the same as the others at your local field.

#### Specifications:

Wingspan: 51 inches

Wing Area: 400 sq. inches

Length (airframe only): 33 inches

Weight: 3-3.5 pounds

Radio:

• 3 or 4 channel system

- 2 40-70 in./oz. servos for elevator and rudder;
- 2 40-70 in./oz. servos for ailerons if making a 4 channel model;
- 1 40-70 in./oz. servo for throttle (if using a glow engine)

Power:

- Electric (.25 equivalent brushless motor, 60 amp ESC, 3S LiPo)
- Glow (.20-.25 engine, 4-6 ounce tank, fuel tubing)

Retail Price - \$109.95
